

# DL110 / DL130

## Premium downlights

Flexible configurations for hospitality and cruise interiors

**DL110**

**DL130**

Our new downlights **DL110** and **DL130** combine excellent light quality with a clean, timeless design – developed for the diverse requirements on board.

Whether in passenger areas, restaurants and lounges, or crew areas, DL110 and DL130 blend seamlessly into a wide range of interior concepts, creating the right lighting and a pleasant atmosphere for every setting. Their minimalist design and easy installation make them a versatile solution for modern ship interiors.

Both models offer a high degree of flexibility for a wide range of applications. A choice of colour temperatures, beam angles, driver options, ring designs and finishes allows each downlight to be tailored to the specific application and interior concept.

For areas with increased protection requirements, the **DL130** is also available with IP55 protection and in a USPH version.

**DL110 and DL130 – clean design, flexible configuration, made for life on board.**
